

CERTIFICATE

of Product Conformity (QAL1)

Certificate No.: 0000039321_01

Certified AMS:

MGA12 for CO, NO, SO₂, O₂ and CO₂

Manufacturer:

Dr. Födisch Umweltmesstechnik AG

Zwenkauer Straße 159 04420 Markranstädt

Germany

Test Institute:

TÜV Rheinland Energy GmbH

This is to certify that the AMS has been tested and found to comply with:

EN 15267-1: 2009, EN 15267-2: 2009, EN 15267-3: 2007 and EN 14181: 2004

Certification is awarded in respect of the conditions stated in this certificate (see also the following pages).

The present certificate replaces certificate 0000039321 of 29 April 2019.

Suitability Tested EN 15267 QAL1 Certified Regular Surveillance

www.tuv.com ID 0000039321

Publication in the German Federal Gazette (BAnz.) of 1 April 2014

This certificate will expire on: 30 June 2020

German Federal Environment Agency Dessau, 1 April 2019 TÜV Rheinland Energy GmbH Cologne, 31 March 2019

51105 Cologne

Accreditation according to EN ISO/IEC 17025:2018 and certified according to ISO 9001:2015.

Certificate:

0000039321_01 / 1 April 2019

Test report:

936/21219366/A of 19 September 2013

Initial certification:

01 April 2014

Expiry date:

30 June 2020

Publication:

BAnz AT 01 April 2014 B12, chapter I, No. 3.4

Approved application

The tested AMS is suitable for use at combustion plants according to Directive 2010/75/EU, chapter III and other plants requiring official approval. The tested ranges have been chosen with respect to the wide application range of the AMS.

The suitability of the AMS for this application was assessed on the basis of a laboratory test and a three-month field test at a lignite-fired power plant.

The AMS is approved for an ambient temperature range of +5 °C to +30 °C.

Any potential user should ensure, in consultation with the manufacturer, that this AMS is suitable for the installation at which it will be installed.

Basis of the certification

This certification is based on:

- test report 936/21219366/A of 19 September 2013 of TÜV Rheinland Energie und Umwelt GmbH
- suitability announced by the German Federal Environment Agency (UBA) as the relevant body
- the ongoing surveillance of the product and the manufacturing process
- publication in the German Federal Gazette (BAnz AT 01 April 2014 B12, chapter I, No. 3.4, Announcement by UBA from 27 February 2014)

AMS designation:

MGA12 for CO, NO, SO₂, O₂ and CO₂

Manufacturer:

Dr. Födisch Umweltmesstechnik AG, Markranstädt

Field of application:

For measurements at plants requiring official approval (Directive 2010/75/EU, chapter III combustion plants)

Measuring ranges during the performance test:

Components	Certification range	Supplementary range	Units
СО	0 - 125	0 - 1000	mg/m³
NO	0 - 300	0 - 1000	mg/m³
SO ₂	0 - 200	0 - 1000	mg/m³
O ₂	0 - 25	-7	Vol%
CO ₂	0 - 20		Vol%

Software version:

1.47

Restrictions:

- 1. The ambient temperature must not exceed +30 °C.
- 2. The performance criterion as related to the expanded uncertainty according to EN 15267-3 was not fulfilled for the component CO.

Note:

The maintenance interval is four weeks.

Test report:

TÜV Rheinland Energie und Umwelt GmbH, Cologne Report No.: 936/21219366/A of 19 September 2013

Certified product

This certificate applies to automated measurement systems conforming to the following description:

The multi-component MGA12 AMS is a measuring system for continuous monitoring of CO, NO, SO_2 , O_2 and CO_2 in exhaust gases.

The components CO, NO, SO₂ and CO₂ are monitored using infrared absorption; O₂ is measured with an electrochemical cell.

The tested AMS comprises the gas analyser which is positioned in a 19" rack housing. The analyser is located in a heated and ventilated system cabinet with the dimensions 2100 x 800 x 600 mm, which also houses the sample gas pump (MGP 12), the sample gas cooler (GCU 12), the connections for measurement values and signals, and other electronic parts for electricity supply. A pump supplies the sample gas cooler with 15 % concentration phosphoric acid in order to prevent SO₂ absorption.

The sample gas is fed to gas preparation via a heated sample gas probe (HSP 12) and a heated sample gas pipe (25 m). The sample gas probe is fitted with a ceramic filter which, like the sample gas pipe, is heated to 180 °C.

General notes

This certificate is based upon the equipment tested. The manufacturer is responsible for ensuring that on-going production complies with the requirements of the EN 15267. The manufacturer is required to maintain an approved quality management system controlling the manufacture of the certified product. Both the product and the quality management systems shall be subject to regular surveillance.

If a product of the current production does not conform to the certified product, TÜV Rheinland Energy GmbH must be notified at the address given on page 1.

A certification mark with an ID-Number that is specific to the certified product is presented on page 1 of this certificate. This can be applied to the product or used in publicity material for the certified product.

This document as well as the certification mark remains property of TÜV Rheinland Energy GmbH. With revocation of the publication the certificate loses its validity. After the expiration of the certificate and on requests of the TÜV Rheinland Energy GmbH this document shall be returned and the certificate mark must not be employed anymore.

The relevant version of this certificate and its expiration is also accessible on the internet: qal1.de.

Certification of MGA12 for CO, NO, SO₂, O₂ and CO₂ is based on the documents listed below and the regular, continuous monitoring of the Quality Management System of the manufacturer:

Initial certification according to EN 15267
